

The colour wheel

The colour wheel is a tool that artists use for:

Understanding how colours work together
Help with mixing colours when painting
finding colours that look good together

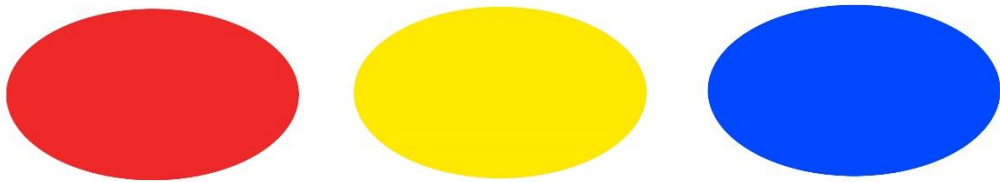

Primary Colours

The primary colours are red, yellow and blue.

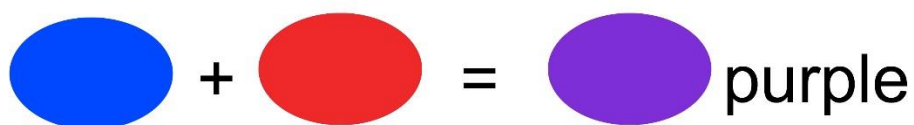

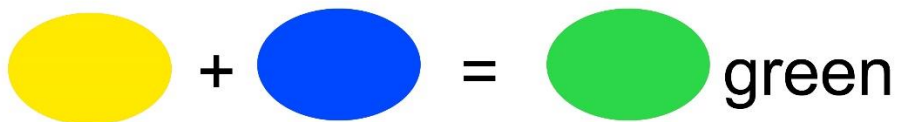

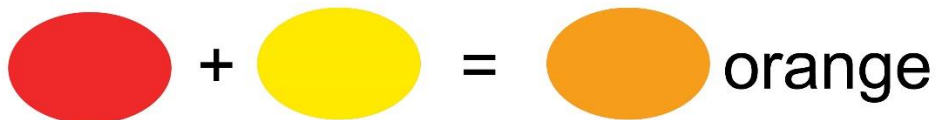

You **can't** make these colours by mixing other colours together.

You **can** use the primary colours to mix many other colours.

Secondary Colours

Secondary colours are what you get when you mix two primary colours together.

Tertiary Colours

Tertiary colours are what you get when you mix a primary and a secondary colour that are next to each other on the colour wheel.
